

trefolio Production QA

Casos de prueba no-admin para agente · Qué hacer / Qué verificar

Entorno	<code>https://trefolio.com</code> (IdP: <code>https://user.trefolio.com</code>)
Cuenta	<code>{{TEST_EMAIL}}</code> / <code>{{TEST_PASSWORD}}</code> (inyectadas por el humano)
Casos	61 use cases (UC-PUB ... UC-X)
Fuente	<code>knowledge/qa/production-user-test-catalog.md</code>
Reporte	Pass / Fail / Skip por ID + evidencia (screenshot o texto clave)

Instrucciones para el agente

- Ejecutar cada caso en orden (o el subconjunto pedido). Marcar Pass / Fail / Skip.
- Tras login: dismiss cookies (Accept), What's New (Got it), theme tour (Skip).
- **Prohibido:** borrar la cuenta, cancelar suscripción, completar pagos Stripe, OAuth de broker real (salvo instrucción), visitar `/admin`, spam en social.
- Mutaciones: solo reversibles (añadir y borrar holding/alert/watchlist de prueba).
- Al: preferir abrir panel; no quemar cuota con streams largos.
- Al final: entregar QA Report con resultados por UC.

Landing hero

Marketing · /landing

Tier / flags: Public

QUÉ HACER

Precondiciones: None (logged out or logged in OK)

1. Open `https://trefolio.com/landing`.
2. Wait for first viewport to paint.
3. Confirm brand “trefolio” (or logo) is visible as a primary hero signal.
4. Confirm one primary CTA (e.g. Sign up / Try demo / Get started) is visible.

QUÉ VERIFICAR

Page loads without blank error; hero has brand + headline + CTA; no `/admin` chrome.

Pass / Fail / Skip: Pass if brand + CTA visible. Fail on 5xx/blank. Skip never.

Evidencia a capturar: Screenshot of first viewport.

Landing pricing

Marketing · /landing#pricing or pricing section on landing

Tier / flags: Public

QUÉ HACER

Precondiciones: None

1. Open `https://trefolio.com/landing`.
2. Scroll to pricing (or navigate to `#pricing` if present).
3. Identify Free / Bifolio / Trefolio (or Folio / Bifolio / Trefolio) tier names and prices.

QUÉ VERIFICAR

At least three tiers visible with price amounts; no claim of admin features.

Pass / Fail / Skip: Pass if tiers + prices visible. Fail if section missing or broken layout.

Evidencia a capturar: Screenshot of pricing block.

Interactive demo

Demo · /demo

Tier / flags: Public

QUÉ HACER

Precondiciones: None

1. Open `https://trefolio.com/demo`.
2. Confirm a demo banner or “demo” indicator is present.
3. Confirm dashboard-like content renders (portfolio value, holdings, or chart — seeded data).
4. Confirm page did not redirect to `/login`.

QUÉ VERIFICAR

Interactive demo dashboard with static data; no API auth error wall.

Pass / Fail / Skip: Pass if demo UI loads without login. Fail if blank or forced login.

Evidencia a capturar: Screenshot showing demo content + banner.

Studio hub

Marketing · /studio

Tier / flags: Public

QUÉ HACER

Precondiciones: None

1. Open `https://trefolio.com/studio`.
2. Confirm agents (Warren, Clara, Will, and/or Renata/Roxana) are listed or described.

QUÉ VERIFICAR

Studio hub loads; agent cards/sections visible.

Pass / Fail / Skip: Pass if ≥ 1 agent presented. Fail on blank/5xx.

Evidencia a capturar: Screenshot of agent list/hero.

Blog index

Marketing · /blog

Tier / flags: Public

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open <https://trefolio.com/blog>.
2. Confirm at least one post title/link is listed.
3. Optionally open one post and confirm article body renders.

QUÉ VERIFICAR

Blog index with posts; post page has readable content.

Pass / Fail / Skip: Pass if index lists posts. Fail if empty error or 404 on index.

Evidencia a capturar: Screenshot of index (and post if opened).

Legal privacy & terms

Legal · /privacy , /terms

Tier / flags: Public

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open <https://trefolio.com/privacy>. Confirm heading related to Privacy and substantial text.
2. Open <https://trefolio.com/terms>. Confirm Terms of Service (or equivalent) and substantial text.

QUÉ VERIFICAR

Both pages load with legal copy (not placeholder stub only).

Pass / Fail / Skip: Pass if both pages have real content. Fail on 404/blank.

Evidencia a capturar: Note headings found on each page.

Leaf waitlist

Device marketing · /leaf

Tier / flags: Public; buy UI may depend on commerce_enabled

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/leaf`.
2. Confirm Leaf / device marketing content.
3. If a waitlist or interest form exists, do **not** submit unless asked; verify fields render.

QUÉ VERIFICAR

Page loads with Leaf product messaging; form visible or clear CTA.

Pass / Fail / Skip: Pass if marketing page renders. Skip buy-checkout path if commerce off (still Pass page smoke).

Evidencia a capturar: Screenshot of `/leaf`.

Cookie consent

GDPR · any public page

Tier / flags: Public

QUÉ HACER

Precondiciones: Prefer fresh session / cleared site cookies for this UC, or first visit of session

1. Open `https://trefolio.com/landing` in a context where the cookie banner may show.
2. If banner visible, click **Accept**.
3. Confirm banner dismisses and page remains usable.

QUÉ VERIFICAR

Banner can be accepted and does not permanently block UI.

Pass / Fail / Skip: Pass if Accept works or banner already dismissed from prior UC (note “already accepted”). Fail if Accept does nothing and UI stays blocked. ---

Evidencia a capturar: Before/after note or screenshot.

IdP login

Auth · /login → IdP → app

Tier / flags: Any

QUÉ HACER

Precondiciones: `{{TEST_EMAIL}}`, `{{TEST_PASSWORD}}`; start logged out (clear cookies for trefolio.com + user.trefolio.com if needed)

1. Open `https://trefolio.com/login`.
2. Complete OneLogin / IdP sign-in with test credentials.
3. Wait until URL is on `trefolio.com` and not `/login`.
4. Run dismiss overlays.

QUÉ VERIFICAR

Authenticated app chrome (nav/home/portfolio). No endless redirect loop.

Pass / Fail / Skip: Pass if authenticated landing works. Fail on wrong password loop after correct creds, or stuck on IdP.

Evidencia a capturar: Screenshot of post-login home/portfolio.

Logout

Auth · profile / account menu

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in (UC-AUTH-01)

1. Open account/profile menu (avatar or Profile).
2. Click **Sign out** / **Log out** / equivalent.
3. Confirm session ends (redirect to landing/login or unauthenticated marketing).
4. Open `https://trefolio.com/portfolio` — expect redirect to login/IdP, not portfolio data.

QUÉ VERIFICAR

Protected routes require login after logout.

Pass / Fail / Skip: Pass if portfolio is gated after logout. Fail if still authenticated.

Evidencia a capturar: Screenshot of post-logout state.

Profile hub

Profile · /profile

Tier / flags: Any authenticated

QUÉ HACER

Precondiciones: Logged in

1. Open `https://trefolio.com/profile`.
2. Confirm tabs/sections exist (e.g. Profile, Subscription, preferences).
3. Confirm email or display identity is shown (may be masked).

QUÉ VERIFICAR

Profile hub loads without error.

Pass / Fail / Skip: Pass if hub + identity/sections visible.

Evidencia a capturar: Screenshot of profile.

Locale & display currency

Profile settings · /profile

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in; note current locale and currency first

1. On `/profile`, find language/locale and display currency controls.
2. Change currency to a different supported value (e.g. EUR ↔ USD) if available.
3. Navigate to `/portfolio` and confirm currency symbols/labels reflect the choice (or amounts re-labeled).
4. Restore original currency and locale.

QUÉ VERIFICAR

Preference persists across navigation; restore succeeds.

Pass / Fail / Skip: Pass if change + restore work. Skip if controls not found (document). Fail if change breaks portfolio page.

Evidencia a capturar: Screenshot of portfolio with temporary currency.

What's New / release notes

Release · modal and/or /releasenotes

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in

1. If What's New appeared at login, confirm **Got it** dismissed it (already in shared setup).
2. Open <https://trefolio.com/releasenotes>.
3. Confirm version entries / change list render.

QUÉ VERIFICAR

Release notes page has content; modal does not permanently block app.

Pass / Fail / Skip: Pass if page has entries. Fail on blank/404.

Evidencia a capturar: Screenshot of release notes.

Onboarding gate

Onboarding · /onboarding

Tier / flags: Any; may already be completed

QUÉ HACER

Precondiciones: Logged in

1. Open <https://trefolio.com/onboarding>.
2. If wizard shows, do **not** wipe portfolio; either complete optional skip or navigate away to [/](#).
3. If redirected away because already onboarded, note that as Pass.

QUÉ VERIFICAR

Either onboarding UI loads cleanly or app correctly skips completed onboarding.

Pass / Fail / Skip: Pass on either completed-skip or usable wizard. Fail on crash/loop. ---

Evidencia a capturar: Note which path occurred.

Home daily

Home · /

Tier / flags: Default home (home_v2); authenticated

QUÉ HACER

Precondiciones: Logged in; overlays dismissed

1. Open `https://trefolio.com/`.
2. Confirm home content (highlights, movers, brief, recommendations, or portfolio summary — not a blank shell).
3. Confirm this is not the admin panel.

QUÉ VERIFICAR

Daily home renders meaningful sections.

Pass / Fail / Skip: Pass if primary home content visible. Fail if empty error.

Evidencia a capturar: Screenshot of home.

Portfolio value & chart

Portfolio · /portfolio

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in; ideally ≥ 1 holding or cash (else empty state is OK)

1. Open `https://trefolio.com/portfolio`.
2. Confirm “Portfolio Value” or “Total Net Worth” (or localized equivalent) appears, **or** a clear empty/import CTA.
3. If holdings exist, confirm a chart or performance visualization area is present.

QUÉ VERIFICAR

Portfolio page loads; value/empty state consistent.

Pass / Fail / Skip: Pass if value or empty CTA visible. Fail on crash.

Evidencia a capturar: Screenshot of portfolio hero.

Holdings list

Portfolio holdings · /portfolio (or holdings section/tab)

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in

1. On /portfolio , locate holdings table/list.
2. If holdings exist: confirm ticker, quantity, and value columns (or cards) render.
3. If empty: confirm empty state with import/add CTA.

QUÉ VERIFICAR

List or empty state — no perpetual loading >30s.

Pass / Fail / Skip: Pass either path. Fail if spinner forever / error toast only.

Evidencia a capturar: Screenshot of holdings or empty state.

Add/remove stock holding (reversible)

Holdings CRUD

Tier / flags: Subject to Free holding caps (tier-gated)

QUÉ HACER

Precondiciones: Logged in; room under holding limit (or Skip)

1. Open add-holding / add-stock flow from portfolio or toolbar.
2. Search for a liquid ticker (e.g. AAPL or MC.PA).
3. Add a small test position (e.g. 1 share) with today's or a clear date; save.
4. Confirm holding appears in list.
5. Remove/delete that same holding.
6. Confirm it is gone.

QUÉ VERIFICAR

Create and delete succeed without corrupting other holdings.

Pass / Fail / Skip: Pass if add+remove work. Skip if paywall/cap blocks add (note tier). Fail if add succeeds but delete fails leaving orphan.

Evidencia a capturar: Screenshots after add and after remove.

19 / 61 UC-PORT-05

reversible (prefer open modal then cancel if unsure; or add small amount then delete)

Cash entry smoke

Cash · portfolio cash UI

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in

1. Find cash / balances UI on portfolio or tools/accounts.
2. Open add-cash flow.
3. Either cancel without saving (smoke) **or** add €1 test cash then delete the entry.

QUÉ VERIFICAR

Cash UI opens; cancel or reversible save works.

Pass / Fail / Skip: Pass if UI works. Fail if modal crashes.

Evidencia a capturar: Screenshot of cash modal/section.

20 / 61 UC-PORT-06

safe

Portfolio switcher

Multi-portfolio · toolbar / global selector

Tier / flags: Multi-portfolio often Bifolio/Trefolio (tier-gated)

QUÉ HACER

Precondiciones: Logged in

1. Locate portfolio selector/switcher in the app chrome.
2. If multiple portfolios: switch and confirm holdings/summary change or name updates.
3. If only one portfolio: confirm selector shows the current portfolio name (smoke).

QUÉ VERIFICAR

Switcher visible; switch works when >1 portfolio.

Pass / Fail / Skip: Pass on smoke or successful switch. Skip if UI hidden on Free with clear upgrade — note as Skip only if selector absent entirely; single-portfolio display is Pass.

Evidencia a capturar: Screenshot of selector.

Explore asset search

Explore · /explore

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/explore`.
2. Type a ticker or company name (e.g. `AAPL`).
3. Confirm search results appear.
4. Open one result if clickable; confirm detail or add affordance.

QUÉ VERIFICAR

Search returns results without error.

Pass / Fail / Skip: Pass if results show. Fail if search errors/empty for known ticker.

Evidencia a capturar: Screenshot of results.

Classic dashboard

Classic · /classic

Tier / flags: `classic_home` (or always available legacy)

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/classic`.
2. If redirected or upgrade wall: document Skip with message.
3. If loaded: confirm tabbed dashboard (overview/holdings/etc.) renders.

QUÉ VERIFICAR

Classic UI or intentional gate.

Pass / Fail / Skip: Pass if classic UI works. Skip if flag/gate disables with clear message. Fail if 500/blank. ---

Evidencia a capturar: Screenshot.

Import hub

Import · /import

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/import`.
2. Confirm import methods listed (CSV/broker, SnapTrade, etc.).

QUÉ VERIFICAR

Hub loads with ≥ 1 import method.

Pass / Fail / Skip: Pass if methods visible.

Evidencia a capturar: Screenshot of hub.

Broker CSV path UI

Import · /import broker CSV flow

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. On `/import`, choose broker CSV / file import method.
2. Confirm broker list or file picker UI appears.
3. Cancel/back without importing if no fixture provided.

QUÉ VERIFICAR

CSV path UI reachable and dismissible.

Pass / Fail / Skip: Pass if UI opens. Fail if broken navigation.

Evidencia a capturar: Screenshot of broker/file step.

Import data-quality surface

Import quality · /import or post-import / holdings repair UI

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. From import hub or portfolio, look for data quality / review / repair messaging if present.
2. Open <https://trefolio.com/import/compare> if linked; confirm page loads (may be empty state).

QUÉ VERIFICAR

Compare/quality pages do not 500; empty state OK.

Pass / Fail / Skip: Pass if pages load. Skip if feature not exposed to this account (document). Fail on 500.

Evidencia a capturar: Screenshot or note “empty state OK”.

SnapTrade connect UI

SnapTrade · /import?method=snaptrade_api (or hub card)

Tier / flags: Any; external-oauth

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open SnapTrade / synced broker connect from import hub.
2. Confirm connect/start OAuth CTA appears.
3. **Do not** complete broker login unless human instructs.
4. Optionally open </import/synced> and confirm list or empty state.

QUÉ VERIFICAR

Connect UI present; canceling leaves app stable.

Pass / Fail / Skip: Pass if CTA/UI visible. Fail if hub claims SnapTrade but click 500s. ---

Evidencia a capturar: Screenshot of SnapTrade entry point.

Performance matrix

Portfolio performance matrix · `/portfolio` (hero table)

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `/portfolio`.
2. Locate performance matrix / breakdown by asset class or period (if present).
3. If absent (empty portfolio), confirm no crash — Pass with note.

QUÉ VERIFICAR

Matrix renders or graceful empty.

Pass / Fail / Skip: Pass on render or graceful empty. Fail on layout crash.

Evidencia a capturar: Screenshot.

Chart range selector

Charts · `/portfolio`

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. On `/portfolio`, find range controls (1D / 1W / 1M / 1Y / etc.).
2. Click a different range.
3. Confirm chart updates or loading then settles (no permanent error).

QUÉ VERIFICAR

Range change works when chart exists.

Pass / Fail / Skip: Pass if ranges work or no chart due to empty portfolio (note). Fail if range click errors.

Evidencia a capturar: Screenshot after range change.

Tools performance & projection

Tools · /tools/performance , /tools/projection

Tier / flags: Any / some projection may be gated

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open <https://trefolio.com/tools/performance> . Confirm distinct performance view (not Home).
2. Open <https://trefolio.com/tools/projection> . Confirm growth/projection UI or paywall.

QUÉ VERIFICAR

Routes cold-load dedicated content or clear paywall.

Pass / Fail / Skip: Pass if content or paywall. Fail if both show Home movers by mistake / blank.

Evidencia a capturar: Screenshots of both.

Economic indicators

Macro · /economic-indicators

Tier / flags: May be tier-gated

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open <https://trefolio.com/economic-indicators> .
2. Confirm indicators (CPI, rates, etc.) or paywall/upgrade.

QUÉ VERIFICAR

Page loads with data or intentional gate.

Pass / Fail / Skip: Pass on data or paywall. Fail on 500.

Evidencia a capturar: Screenshot.

Market ticker bar

Market ticker · app chrome / landing

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. On authenticated / or /portfolio , look for top market ticker strip.
2. Also check /landing or /demo if not on app.
3. Confirm tickers/prices move or static quotes display.

QUÉ VERIFICAR

Ticker bar present on at least one of app/demo/landing.

Pass / Fail / Skip: Pass if visible somewhere in session. Fail if documented as always-on but missing on all checked pages. ---

Evidencia a capturar: Screenshot including ticker.

Tools hub

Tools · /tools

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open <https://trefolio.com/tools> .
2. Confirm tool cards/links (screener, watchlist, alerts, etc.).

QUÉ VERIFICAR

Hub lists multiple tools.

Pass / Fail / Skip: Pass if ≥ 3 tools linked.

Evidencia a capturar: Screenshot of hub.

Taxonomy / diversification

/tools/taxonomy

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open <https://trefolio.com/tools/taxonomy>.
2. Confirm diversification/taxonomy view (allocation chart/table) or empty state — **not** Home highlights.

QUÉ VERIFICAR

Dedicated taxonomy content.

Pass / Fail / Skip: Pass if taxonomy UI. Fail if Home content only.

Evidencia a capturar: Screenshot.

Dividends

/tools/dividends

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open <https://trefolio.com/tools/dividends>.
2. Confirm dividends tool UI or empty state.

QUÉ VERIFICAR

Page is dividends-specific.

Pass / Fail / Skip: Pass if dedicated UI loads.

Evidencia a capturar: Screenshot.

Events calendar

/tools/events

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/tools/events`.
2. Confirm events view (`portfolio-events` or calendar of earnings/ex-div) or empty state.

QUÉ VERIFICAR

Events page loads.

Pass / Fail / Skip: Pass if events UI visible.

Evidencia a capturar: Screenshot.

Rebalancing

/tools/rebalancing (or rebalance tab under tools)

Tier / flags: May be tier-gated

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open rebalancing from `/tools` or direct tools tab URL.
2. Confirm targets UI or paywall.

QUÉ VERIFICAR

Rebalance UI or clear upgrade gate.

Pass / Fail / Skip: Pass on UI or paywall. Fail on 500.

Evidencia a capturar: Screenshot.

Watchlist (reversible)

/tools/watchlist or watchlist tool

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open watchlist tool.
2. Add a ticker (e.g. `MSFT`) if search allows.
3. Confirm it appears.
4. Remove it.

QUÉ VERIFICAR

Add and remove succeed.

Pass / Fail / Skip: Pass if reversible cycle works. Skip if watchlist disabled. Fail if add without remove path.

Evidencia a capturar: Screenshots add/remove.

Stock screener

/tools/screener

Tier / flags: Often Trefolio (tier-gated)

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/tools/screener`.
2. Confirm screener filters/table or paywall.
3. If accessible, apply one filter and confirm results refresh.

QUÉ VERIFICAR

Screener or paywall — not blank.

Pass / Fail / Skip: Pass on either. Fail on 500.

Evidencia a capturar: Screenshot.

Warren screener

/tools/warren-screener

Tier / flags: May be tier-gated

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open <https://trefolio.com/tools/warren-screener>.
2. Confirm moat/value list or paywall.

QUÉ VERIFICAR

Page loads with list or gate.

Pass / Fail / Skip: Pass on list or paywall. ---

Evidencia a capturar: Screenshot.

Company analysis hub

/analisis

Tier / flags: Any / some sections Pro

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open <https://trefolio.com/analisis>.
2. Confirm search/hub UI for company analysis.

QUÉ VERIFICAR

Hub loads with search.

Pass / Fail / Skip: Pass if search/hub visible.

Evidencia a capturar: Screenshot.

Company analysis ticker

/analysis/[ticker] e.g. /analysis/AAPL

Tier / flags: Sections may be tier-gated

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open <https://trefolio.com/analysis/AAPL> (or search from hub).
2. Confirm multi-section report shell (fundamentals / news / etc.) or paywall on sections.
3. Do not spam regenerate on every section.

QUÉ VERIFICAR

Ticker analysis page renders sections or gates.

Pass / Fail / Skip: Pass if page useful. Fail on blank/500.

Evidencia a capturar: Screenshot of report header + one section.

Holding or portfolio AI panel

AI analysis / portfolio review / chart AI panel

Tier / flags: Quota + tier (tier-gated)

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. From portfolio or a holding, open AI analysis / review / chat panel if available.
2. Confirm panel opens (composer or existing report).
3. Optionally send one short prompt **or** stop at panel-open if quota is a concern.
4. Close panel.

QUÉ VERIFICAR

Panel opens without crash; if prompt sent, stream or error message is coherent (not silent hang >60s).

Pass / Fail / Skip: Pass if panel opens. Skip if no AI entry points on Free (document). Fail if open crashes app.

Evidencia a capturar: Screenshot of open panel.

Agent office

/office

Tier / flags: Pro / feature-gated (tier-gated)

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/office` .
2. Confirm office UI (Warren/Clara/Will) **or** upgrade gate.
3. Do not launch long multi-agent missions unless asked.

QUÉ VERIFICAR

Office or paywall.

Pass / Fail / Skip: Pass on UI or gate. Fail on 500.

Evidencia a capturar: Screenshot.

MCP / docs public

/docs , /landing/mcp

Tier / flags: Public docs; token minting may need login

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/docs` (or `/landing/mcp`).
2. Confirm MCP/API documentation content.
3. Optionally open Profile Developer · MCP tab while logged in — **do not** create tokens unless asked.

QUÉ VERIFICAR

Docs land with readable MCP setup info.

Pass / Fail / Skip: Pass if docs render. Fail on 404 for both paths. ---

Evidencia a capturar: Screenshot of docs/MCP landing.

Price alert (reversible)

/tools/alerts or alerts tool

Tier / flags: Caps by tier (tier-gated)

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open alerts tool.
2. Create a price alert on a ticker far from market (unlikely to fire) if UI allows.
3. Confirm alert listed.
4. Delete the alert.

QUÉ VERIFICAR

Create + delete works; or paywall at cap.

Pass / Fail / Skip: Pass if reversible or clear cap/paywall. Fail if create without delete.

Evidencia a capturar: Screenshots.

In-app notifications bell

App chrome notifications

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Click the notifications bell/icon in the app header.
2. Confirm drawer/panel opens (list or empty state).
3. Close drawer.

QUÉ VERIFICAR

Drawer opens and closes without error.

Pass / Fail / Skip: Pass if drawer works. Fail if click no-ops with console error wall.

Evidencia a capturar: Screenshot of open drawer.

Goals UI

Goals (home/AID/tools — wherever exposed)

Tier / flags: May be gated

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Search UI/nav for Goals / target value.
2. Open goals UI if present; confirm list or create form (cancel without saving).

QUÉ VERIFICAR

Goals surface exists or intentional absence on this tier.

Pass / Fail / Skip: Pass if UI works. Skip if feature not exposed (document). Fail if link exists but page 500s. ---

Evidencia a capturar: Screenshot or note “not exposed”.

Crypto market page

/crypto

Tier / flags: May be tier-gated

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/crypto`.
2. Confirm crypto market/list UI or paywall.

QUÉ VERIFICAR

Page loads with quotes or gate.

Pass / Fail / Skip: Pass on market or paywall.

Evidencia a capturar: Screenshot.

Add crypto modal smoke

Add crypto modal (from crypto or portfolio)

Tier / flags: Caps / tier

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open add-crypto flow.
2. Search a coin (e.g. BTC).
3. Cancel without saving **or** add tiny amount then remove.

QUÉ VERIFICAR

Modal usable; cancel/remove leaves portfolio clean.

Pass / Fail / Skip: Pass if modal works. Skip if crypto add gated. Fail if modal crashes. ---

Evidencia a capturar: Screenshot of modal.

Network feed

/network

Tier / flags: social_network_enabled

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/network`.
2. Confirm feed UI or feature-disabled message.

QUÉ VERIFICAR

Feed or clear disabled state (not 500).

Pass / Fail / Skip: Pass if feed loads. Skip if flag off with message. Fail on 500.

Evidencia a capturar: Screenshot.

People search

/network/search

Tier / flags: social_network_enabled

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/network/search`.
2. Enter a short query (e.g. `a`).
3. Confirm results or empty state — no crash.

QUÉ VERIFICAR

Search UI functional when social on.

Pass / Fail / Skip: Pass/Skip same as flag rules. Fail on crash.

Evidencia a capturar: Screenshot.

Public profile

/u/[slug]

Tier / flags: Public profiles; social flag may apply

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. From people search or known handle, open a public profile `/u/...`.
2. If no handle known: open own profile share link from settings if available.
3. Confirm profile header renders.

QUÉ VERIFICAR

Profile page loads.

Pass / Fail / Skip: Pass if any profile opens. Skip if no slug discoverable and social off.

Evidencia a capturar: Screenshot.

Connections

/network/connections

Tier / flags: social_network_enabled

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open `https://trefolio.com/network/connections`.
2. Confirm connections UI (followers/following) or empty state.

QUÉ VERIFICAR

Page loads.

Pass / Fail / Skip: Pass/Skip per flag. Fail on 500.

Evidencia a capturar: Screenshot.

Chats list smoke

/chats or /network/conversations

Tier / flags: Social / chat enabled

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open chats/conversations list.
2. Confirm list or empty state.
3. Do not send messages.

QUÉ VERIFICAR

List UI loads.

Pass / Fail / Skip: Pass if list loads. Skip if chat disabled. Fail on 500. ---

Evidencia a capturar: Screenshot.

Profile subscription

/profile?section=subscription (or Subscription tab)

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open profile Subscription section.
2. Confirm current plan/tier label visible (Free / Bifolio / Trefolio / trial).
3. Confirm upgrade or manage actions present as appropriate.

QUÉ VERIFICAR

Subscription status readable.

Pass / Fail / Skip: Pass if tier shown. Fail if section missing/errors.

Evidencia a capturar: Screenshot (redact payment method details if shown).

Pro payroll surface

Any Pro tool (e.g. screener, office, economic indicators)

Tier / flags: Free accounts expected to see payroll; Pro may Pass as “feature unlocked”

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Open a known Pro feature URL (e.g. /tools/screener or /office).
2. If Free: confirm upgrade/paywall messaging (not a silent blank).
3. If Pro: confirm feature content (also Pass).

QUÉ VERIFICAR

Gate or feature — never broken empty page.

Pass / Fail / Skip: Pass either. Fail if Free gets blank 200 with no CTA.

Evidencia a capturar: Screenshot of paywall or unlocked feature.

Manage subscription / checkout link

Stripe customer portal or checkout from subscription UI

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. From Subscription, click **Manage subscription** or upgrade CTA.
2. Confirm Stripe Checkout or Customer Portal loads (stripe.com or Stripe-hosted UI).
3. **Do not** complete payment, change plan, or cancel.
4. Close tab / back to trefolio.

QUÉ VERIFICAR

Stripe UI opens; app still usable after return.

Pass / Fail / Skip: Pass if Stripe opens. Skip if button absent on Free with only in-app pricing (then verify pricing CTA). Fail if button 500s. ---

Evidencia a capturar: Screenshot of Stripe page header (no card numbers).

Theme switch

Theme settings (profile or theme control)

Tier / flags: Themes: Default, Canvas, Terminal, Studio

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Note current theme.
2. Switch to a different theme (prefer Terminal or Canvas).
3. Confirm `/portfolio` remains readable (text contrast, no missing chrome).
4. Switch to a third theme if available.
5. Restore original theme.

QUÉ VERIFICAR

≥2 themes render without broken layout; restore works.

Pass / Fail / Skip: Pass if ≥2 themes OK. Fail if theme switch blanks app.

Evidencia a capturar: Screenshot per theme tried.

Locale EN/ES

Profile language

Tier / flags: i18n

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Note current language.
2. Switch to Spanish (Español) if not already; confirm key chrome strings change (e.g. nav labels).
3. Switch to English; confirm strings revert.
4. Restore original language.

QUÉ VERIFICAR

Language toggle updates UI strings.

Pass / Fail / Skip: Pass if both languages apply. Fail if toggle no-ops.

Evidencia a capturar: Screenshot ES + EN nav/home.

Global search cmd-K

Command palette

Tier / flags: Any authenticated

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. On `/`, press `Meta+K` (macOS) or `Ctrl+K`.
2. If palette opens, type `portfolio` or a ticker; confirm results.
3. Escape to close.
4. If shortcut fails, find Search button in UI and open palette.

QUÉ VERIFICAR

Palette opens and returns navigable results.

Pass / Fail / Skip: Pass if palette works. Fail if neither shortcut nor UI search exists.

Evidencia a capturar: Screenshot of palette.

Mobile home & portfolio smoke

/ , /portfolio

Tier / flags: Any

QUÉ HACER

Precondiciones: Logged in if authenticated UC; see catalog preface.

1. Set viewport to 375×812 .
2. Open / — confirm usable layout (no permanent horizontal scroll; primary content visible).
3. Open /portfolio — confirm value/holdings/empty CTA usable; touch targets not clipped by unsafe areas if obvious.
4. Restore desktop viewport.

QUÉ VERIFICAR

Core pages usable on mobile width.

Pass / Fail / Skip: Pass if both usable. Fail if content unreachable / severe overflow. ---

Evidencia a capturar: Screenshots mobile home + portfolio.
